BUILT FOR BETTER-SOUNDING SPACES.

Uttam Industries develops acoustic wood-fiber solutions for architects, designers and acousticians - balancing performance, design flexibility and responsible material choices.

“
Our focus is
simple:
understand the
space, meet the
acoustic need and
deliver a finish that
belongs in the
design.”

A practical approach to acoustic ceilings, wall panels and dry-wall applications.

WHAT MAKES UTTAM DIFFERENT

● Sound absorption

NRC up to 0.9

● Thermal performance

Thermal value: 0.07 W/mK

● Material story

Wood fiber + magnesite

● Design freedom

Natural, color & grooved options

ONE BOARD. ONE TREE.

We pledge to plant a tree for every board sold.

NATURAL MATERIAL. ENGINEERED PERFORMANCE.

WOOD WOOL / FIBRE

Uttam Acoustic Wood Wool combines wood and magnesite - two long-established building materials - to create a natural panel with sound absorption, insulation and heat-retention performance.

TECHNICAL DATA

Finish	Wood Fiber
Core	Wood Fiber
Thickness (mm)	15, 20, 25,30,35,40,50
Size (mm)	595×595 / 1195,1200X1220, 600×600 / 1200
Weight (kg/board)	5.2, 6.2, 7.2 (for 15, 20, 25mm respectively)
Fire (Class)	1 & P
Thermal (W/mK)	0.07
Climate (°C, RH)	50, 95
Light (%)	White: 80; black / colors dependent
Green (VoC, RC%)	Low, 35
Maintenance	Brush, vacuum, repaint

THE ORIGINAL WOOD WOOL SURFACE.

A tactile wood-fiber finish with a permeable, open structure designed for acoustic and thermal performance.

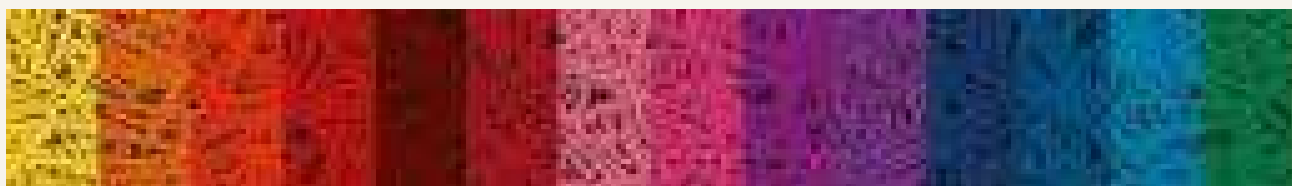

UTTAM LIGNO

Superfine long pine wood-wool fibers fortified with magnesite and permitted additives. The resulting open structure gives a distinctive wood-fiber finish with sound and thermal benefits.

UTTAM LIGNO COLORED

The same textured panel in a colored finish, with 500+ color options for interiors that need acoustic performance without compromising visual identity.

CUSTOMIZATION AVAILABLE

COLOR RANGE

GEOMETRY THAT WORKS HARDER.

Environment-friendly, recyclable wood-wool tiles bring acoustic function into a modular design language.

SQUARE / HEXAGONAL

Build calm grids, rhythmic fields or bold geometric feature walls.

NATURAL TEXTURE

Organic visual depth with a clean modular format.

DESIGN FLEXIBILITY

Mix shapes and colors to create custom compositions.

GROOVED PANELS. MORE WAYS TO DESIGN.

Laser-grooved wood wool panels turn a functional acoustic surface into a repeatable pattern system.

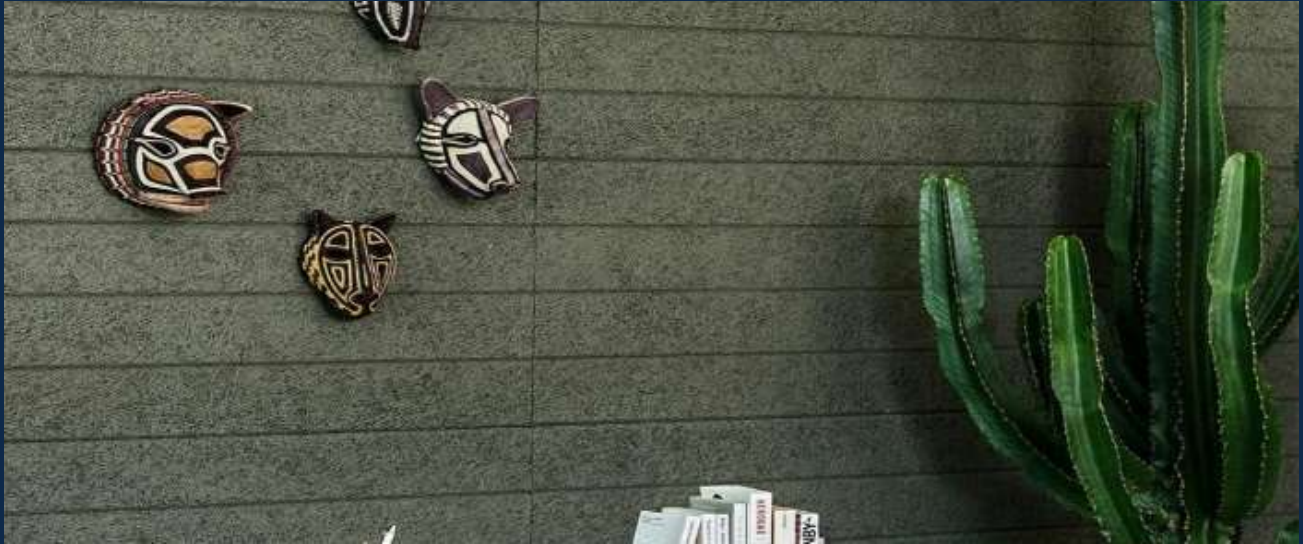

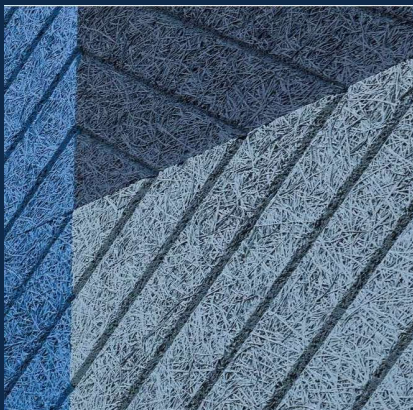

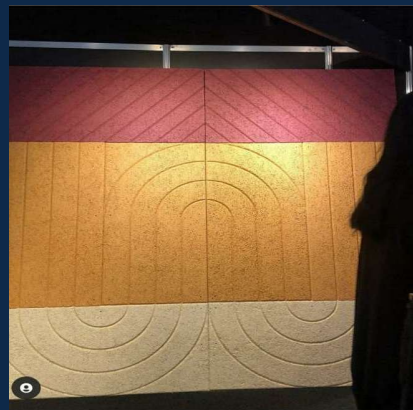

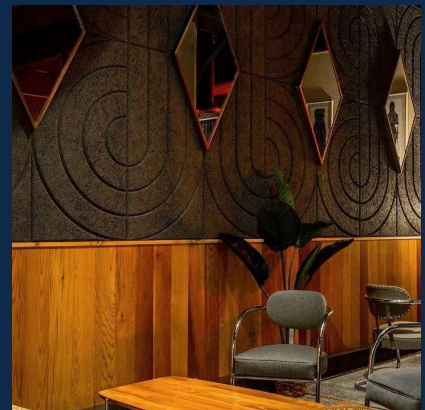

MIX. MATCH. REPEAT.

Evergreen grooves can be combined across boards to build continuous linear, radial and geometric compositions.

CUSTOMIZATION AVAILABLE

500+ COLOR OPTIONS. ONE ACOUSTIC CANVAS.

Choose a pattern. Choose a color. Play with the surface.

NOW AVAILABLE: BRICK-WALL PATTERN

Customization available for colors and grooved designs.

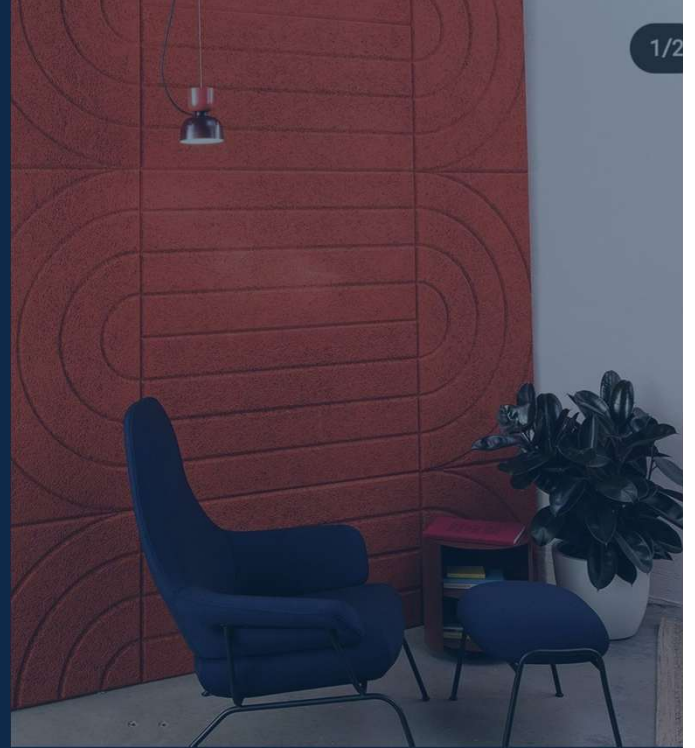

Color and pattern combinations can be used to create feature walls, ceiling fields and branded interior moments.

LET'S BUILD QUIETER SPACES.

Boards. Tiles. Grooved panels. Custom colors.
